

2021: Volume 67, Issue 2

Dear Reader

*GeoScience Engineering* is an open access, peer-reviewed periodical journal aimed at publishing research results in Earth Sciences, Mining and Geological Engineering. The journal is published by the Faculty of Mining and Geology, VSB-Technical University of Ostrava, Czech Republic, and has been listed among peer-reviewed periodicals published in the Czech Republic since 2010.

We aspire to publish high-quality professional articles from all over the world, both from well-established authors and younger researchers. To stimulate the international exchange of knowledge and research findings, we provide scholars and practitioners with space to publish their original professional articles, reviews, and technical briefs, thus contributing to the interconnections of the academic and industrial sectors.

To communicate with international audiences, we publish in English. All articles are subject to a blind review process. All submissions are judged as for their relevance from the professional perspective, methodology, novelty of research findings, practical implications, and quality of presentation.

The current issue consists of 4 articles on different aspects of Earth Sciences, Mining and Geological Engineering (Investigation of Vertical Deformation around Trabzon Tide Gauge Station by Yilmaz and Demirsoy; Comparative Analysis of the Natural Gas Sector in Ukraine and the Czech Republic, Threats and Development Prospects by Boiko et al.; The Effect of Setting the Operating Conditions of the Sampling Device on the Representative Sample of Coal by Žurovec et al.; When the Modifications Made to the Foggara Disturb the Environment by Ghachi et al.).

Sincerely

*Alena Kašpárková*

Editor-in-Chief
